

## Proceedings of Highway and Bridge Engineering

### Actual Trends

#### - Content -

- |   |  |    |
|---|--|----|
|    | Fresh Concrete Curing Treatment for Horizontal Surfaces<br><i>By Vít Petránek</i>  | 5  |
|   | Slip-resistant surface treatments with recycled container glass utilization<br><i>By Tomáš Melichar, Vít Petránek</i>                      | 15 |
|  | Self Compacting Concrete – a structural material of high efficiency<br><i>By Ciprian Asăvoaie, Sergiu Călin</i>                            | 22 |
|  | Experimental program regarding “Bubble Deck” concrete slab with spherical gaps<br><i>By Sergiu Călin, Ciprian Asăvoaie</i>                 | 34 |
|  | Risk factors and safety at work in potentially explosive environments<br><i>By Nicolae Barbu</i>   | 41 |
|  | Study for the establishment of a consolidation solution of the county road DJ 178<br><i>By Alexandru Amarie, Ioan Tănăsele</i>             | 55 |
|  | Design, Materials and Construction Analysis of a Concrete Pavement<br><i>By Elena Pușlău</i>   | 64 |
|  | Structural design of flexible pavements for low traffic volume roads by using various methods<br><i>By Ioan Tanasele, Alexandru Amarie</i> | 72 |
|  | Bridge instrumentation<br><i>By Boaca Gheorghita, Ionescu Constantin</i>   | 94 |

-  The use of non-destructive methods for testing indirect foundations of bridges on motorway A3  
*By Cristina Romanescu, Constantin Ionescu* 101
-  Analysis of efforts state from bridge decks with hinged beams when the hinges are blocked  
*By Cristian Blejeru, Constantin Jantea* 115
-  Aspects of in situ testing of piles with large diameter. Study case.  
*By Pleșcan Costel, Varlam Florin* 126
-  Consolidation technologies and protection of difficult soil foundations.  
*By Gheorghijă Ariton, Aurelian Antonius Mănuță, Paulică Răileanu* 135
